

WebTimeT&Aä is the intranet/extranet based time and attendance solution of the WebTimeTMS product range. Designed to be installed and managed by the client from large corporates to SME's. You can choose the standard solution or a custom design, which blends seamlessly into your current intranet/extranet and will accept input from a wide variety of access control and IT access technologies.

Current Issues:

- ❖ A lot of manual effort required to manage staff time and attendance
- ❖ No one simple interface to manage both time and attendance and time booking activities
- ❖ Potential mis-posting of times in and out due to poor user knowledge
- ❖ Manual input by central admin function or secretary
- ❖ Late or historic reporting on time bookings and activities
- ❖ Simple, intuitive web interface with no client software to install. Works on virtually any browser.
- ❖ Quick and easy personnel and location creation
- ❖ **Immediate savings** in time and attendance processing
- ❖ Flexible and powerful reporting for staff time and attendance and payroll processing
- ❖ Integrates quickly with existing accounting, payroll, HR and project management systems. Downloads from and uploads to Microsoft Project.
- ❖ Real time online authorisation / workflow functions with notifications for managers and staff

WebTimeT&Aä will solve all these problems and provide substantial cost savings and qualitative benefits. Managers and staff will have information at their fingertips and in a format that the whole world has come to expect as standard, the web browser.

Key Features:

- ❖ **Installs within two days** and is totally scaleable to any number of employees and locations.

Technical Features:

- ❖ IIS and SQL Server based, ODBC for other databases available
- ❖ Installation is simple and integrates quickly
- ❖ Following any customisation a fully operational turn key solution is delivered and installed
